

## REHAU EURO-DESIGN 70 WINDOWS

EXCELLENT THERMAL INSULATION, MODERN DESIGN

Windows are often a lifetime investment. When building or renovating a house or a flat you are faced with an important decision. If you attach great significance to modern design, comfort of living and saving of costs thanks to effective thermal insulation, you have made the right decision by choosing REHAU Euro-Design 70 windows.

### Windows for demanding clients

You are investing a lot into your house or flat. You want the investments you make to fulfil your individual requirements down to the smallest details. With REHAU Euro-Design 70 windows you can be sure that your house will be a warm and cosy place. The five-chamber construction of profiles and excellent parameters of thermal protection contribute to the decrease of energy usage.

Five-chamber construction of profiles permits good parameters of thermal and acoustic protection to be achieved.

Different profiles of the sash (surface staggered, semi-surface staggered and oval staggered) as well as a broad range of glazing beads will meet your requirements concerning the appearance of new windows. You will also perfectly match the REHAU Euro-Design 70 windows in terms of their shape and the way of opening them to the façade of the building and interior of your flat.

The 70 mm depth and five-chamber construction of profiles ensure effective thermal protection.

Thermal transmittance (U-value) –  $U_f^* = 1,3 \text{ W/m}^2\text{K}$

\*  $U$  – is a measure of thermal transmittance through a building component, usually a window. The lower the value, the greater the thermal insulation performance.

The REHAU quality mark

#### Advantages of the system in brief:

##### REHAU Euro-Design 70 window profile system

Thermal insulation (U-value):	$U_f = 1,3 \text{ W/m}^2\text{K}$
Profile depth:	70 mm / 5 chamber system
Break-in protection:	Up to resistance class WK 2
Sound insulation:	confirmed acoustic protection of $R_w = 45 \text{ dB}$
Surface of profiles:	durable, smooth, weatherproof, easy to clean

- excellent solution for low-energy houses and for thermomodernisation of buildings
- possibility to install REHAU Comfort-Design Plus roller shutter system
- five-chamber profiles
- for windows and balcony doors
- fulfils contemporary building requirements
